

Habiba Mohamed Bahbah

Computer Science Student

+20 120 675 8213 | habiba.mohamed.bahbah39@gmail.com | www.linkedin.com/in/habiba-mohamed-bahbah | [Habiba39200](#) | Giza, Egypt

Summary

Passionate about advancing a career in software development and education, with foundation in Java, Python, and C++. Successfully completed a range of software projects—both individual and collaborative, demonstrating problem-solving abilities, adaptability, and teamwork. With a solid academic background in computer science and hands-on experience, I am committed to supporting educational initiatives through tutoring and active participation in programming competitions such as ICPC. Eager to contribute to organizations focused on technology, learning, and continuous professional growth.

Education

Bachelor of Computer Science

Nile University – Egypt

Expected Graduation: June 2027 GPA:

3.5 / 4.0

Technical Skills

- Programming: Java, C++, Python
- Web: HTML, CSS, JavaScript
- GUI Development: Java Swing, Python (Pygame)
- Tools: Git, GitHub, VS Code, Microsoft Office
- Concepts: Logic Design, OOP, Problem Solving

Experience & Activities

- Junior Teaching Assistant – Introduction to Computer Systems
Assisted students in labs and explained computer system fundamentals.
- Participated in ICPC competition (July 2024)
- Club Organizer – Active in ICPC and Book Club at Nile University

Courses & Training

- Software Development Program – Sprints- Part of a program focused on developing software projects through collaborative sprints
- Android Mobile Development Internship – Maharatak Platform- Internship focused on mobile app development for Android devices
- IT Intern – Mantrac Distribution (16–21 Aug 2025)
- Front-End Web Development Intern – Elevvo Pathways
10 Aug 2025 – 27 Aug 2025
- Cisco – Data Science, Modern AI, IoT and Digital Transformation (Training)
1 Aug 2025 – 31 Aug 2025
- Web Designer Intern – NTI 17 Aug 2025– 11 Sep2025
- Web Development intern – ITI 4 Aug 2025– 6 Sep 2025
- Intern – Bank CIP 7 Sep 2025 –18 Sep 2025

Projects

Restaurant Menu Website| HTML, CSS

12/2023-1/2024

Developed a responsive menu interface for a restaurant using front-end technologies.

Ninja Game | Python GUI

12/2023-1/2024

Created an interactive game with graphics using Python (Pygame).

Maze Solver Robot | Arduino

4/2024-5/2024

Designed and implemented an autonomous robot using Arduino that can solve mazes by detecting walls and making directional decisions. Utilized IR sensors for path detection and logical algorithms to navigate through complex mazes

Chess Game | C, GUI

4/2024-5/2024

Built a chess application with player score tracking.

University System | C++

12/2024-1/2025

Simulated basic university data management using OOP principles in C++.

Student Grading System | Java Swing**4/2025-5/2025**

Created a full-featured grading system with a GUI to manage students, calculate GPA, and generate reports.

Binary to Hexadecimal Converter | Logic Design (Hardware)**4/2025-6/2025**

Built

a hardware circuit to convert binary numbers to hexadecimal using logic gates and breadboard.

Maze Solver Generator | Python**4/2025-6/2025**

Developed a maze generation application using Python algorithms and visual output.
